- 

---

### Experience

Knackbout Studio Pvt. Ltd. Bangalore /[Web Developer Intern](#)

MARCH 2019 - Continue In Bangalore

- [Nodejs Socketio](#) - Real time Quiz Game with NodeJS, Socket.io and ExpressJS Where two or more players can play a game in a private Room or in a public Room and Shown all Online Users who are connected in Room .
- [Knackbout.com](#)- This is Innovative game based learning platform to improve your coding and language skills. This website is developed by me and my team Members.
- [Technology Used](#) - HTML, CSS, Bootstrap, JavaScript, Codeigniter, PHP, Nodejs

---

## Projects

---

### [Lead Management System \(LMS\)](#) / [Live application In SISTec College](#)

MARCH 2019 - APRIL 2019

I have developed Admission Management System for my college in which college admin can assign leads to admission department and the particular faculties where they can work on that leads until admission.

All working leads are parallely shown to college admin and all faculties have different role in this system.

### [Tsunami Alert System/ Smart India Hackathon](#)

FEBRUARY 2019

This is a SIH project. I and my team members made this project with AI Based Solution. In this Project We made a software in which we take SAR Images as Input & alter to clear noise this working done in matlab. Then, we have used SVM algorithm of ML to enhanced the features of images & Detect Tsunami areas. Then, we can provide magnitude, Area & Range of Earthquake on Web app, after that this data is pass through Azure Cloud & used Decision Forest Regression Algorithm for Detecting the Tsunami & alert through SMS, Email, Android App & web app.
